

THE MORGAN CENTER

For Preschool Age Children with Cancer

December 2, 2025

Dear Friends,

This fall, **THE MORGAN CENTER** (TMC) began our 22nd year providing quality early childhood development programs to preschool age children battling cancer. I wanted to share just a few special moments.

**First day of school
TMC NY 2003**

**First day of school
TMC FL 2019**

On the first day of school, a young girl with cancer who is normally not feeling well from chemotherapy **stood eagerly at her parents' bedside at 5:00 AM, declaring she was ready to go to school!** - she just couldn't wait to see her classmates at **THE MORGAN CENTER!**

A devoted mother drives 2 hours each way so her son who is battling cancer can attend **THE MORGAN CENTER** to grow academically, socially and emotionally.

TMC enrolled our first international student! In the U.S for cancer treatment, her parents are thrilled **TMC CLASSROOM®** program will provide cognitive, social and emotional support to their child during this very difficult time in her young life.

TMC CLASSROOM

In the 2024/25 school year **TMC provided over 14,000 hours** of early childhood programs to children battling cancer in-person in New York and Florida and on **TMC CLASSROOM®** in 19 states – **FREE OF CHARGE!** TMC removes the medical, geographic and economic barriers so preschool age children battling cancer can have access to early childhood development programs.

These are just a few of **THE MORGAN CENTER** highlights made possible through your generosity and belief in our mission.

You understand why **THE MORGAN CENTER** is important ... and researchers from Harvard University agree.

90 percent of brain development happens before age 5¹. Early childhood toxic stress damages developing brain architecture, which can lead to life-long problems in learning, behavior and physical and mental health.

1. Center on the Developing Child, The Science of Early Childhood Development, Harvard University, July 2, 2019

THE MORGAN CENTER reduces 'toxic stress' for children battling cancer by providing early childhood development programs for cancer patients to help them overcome life-long problems in learning, behavior and mental health!

Would you please consider making a donation today to THE MORGAN CENTER to help us continue our important mission?

Thank you for making a difference in the lives of young children battling cancer.

With Gratitude and Respect,

Nancy Lee Zuch
